

RUSHIL KANSARA

PRODUCT MANAGEMENT & CLOUD PLATFORM ENGINEER

Product Management professional & Cloud Platform Engineer with hands-on experience in owning end-to-end product strategy, roadmap execution, and internal platform modernization at enterprise scale. Targeting Product Manager roles in product-based organizations.

PROFILE SUMMARY

- Product & Cloud Platform Engineer with nearly 3 years of experience at enterprise scale, transitioning into Product Management with proven ownership of product vision, roadmap, and execution for internal platform tools.
- Led end-to-end product strategy for a centralized platform monitoring solution (AGRID THOR), improving system observability and reducing operational monitoring time by 3x through automation and standardization.
- Strong experience in translating complex technical infrastructure challenges (Kubernetes, cloud platforms, CI/CD systems) into clear product requirements, PRDs, and actionable roadmaps.
- Showcased ability to drive data-driven product decisions using incident analysis, operational risk metrics, and stakeholder inputs to define and prioritize product backlogs and OKRs.
- Experienced in cross-functional stakeholder management across Engineering, SRE, Security, and Operations teams, ensuring alignment on product priorities, trade-offs, and delivery milestones.
- Certified SAFe 6 Product Owner/Product Manager with expertise in Agile & SAFe methodologies, backlog prioritization, and enterprise platform scaling, supported by strong communication, analytical thinking, and product strategy skills.

CORE COMPETENCIES

Product Strategy & Vision	Backlog Prioritization	OKR & KPI Definition
Roadmap Planning & Execution	PRD Writing & Requirements Gathering	Internal Developer Platform (IDP)
Technical Product Management	Stakeholder Management & Alignment	Cloud Platform & Observability Products
Platform Product Ownership	Agile & SAFe Product Delivery	Cross-functional Team Collaboration

WORK EXPERIENCE

Jul'23 – Present	Product & Cloud Platform Engineer – Senior Associate State Street Corporation, Hyderabad, Telangana - Spearheading product strategy, vision, and roadmap for AGRID THOR for PRD development and backlog governance for a centralized platform monitoring solution used by Support Engineers, SREs, and Platform teams across multiple regions. - Diagnosing recurring operational inefficiencies within monitoring workflows and aligned cross-functional stakeholders on a structured roadmap emphasizing reliability, observability, and support efficiency. - Governing backlog prioritization using data-driven assessment of incident frequency, operational risk exposure, and stakeholder inputs, while defining OKRs to ensure engineering initiatives delivered measurable outcomes. - Developing PRDs for Kubernetes health visibility and advanced filtering capabilities, ensuring delivery of actionable insights while reducing high-volume, low-signal alert noise. - Defining Kubernetes monitoring requirements covering keyword-based pod health validation, dynamic namespace verification, and container-level failure diagnostics to improve signal quality and reduce operational noise. - Introducing structured reporting workflow with environment-specific export abilities, improving leadership transparency and reducing manual status reporting overhead. - Coordinating bi-weekly stakeholder review forums across Engineering, SRE, Security, Operations, and Leadership teams to validate roadmap direction, manage trade-offs, and recalibrate scope based on evolving platform needs.
------------------	---

INTERNSHIP

Jan'23 – Jul'23	Software Engineer Intern State Street Corporation, Hyderabad, Telangana - Contributed to the design of database schemas and development of backend services for two internal applications, enabling integration with REST APIs and Microsoft SQL Server. - Participated in cross-team collaboration across three teams on enterprise automation workflows, supporting enhancements to CI/CD pipelines that reduced overall deployment time.
-----------------	--

KEY ACHIEVEMENTS

- Achieved a 3x reduction in platform monitoring time by transitioning teams from fragmented manual health checks to automated, real-time system status tracking and standardized reporting mechanisms.
- Delivered a single-pane-of-glass dashboard adopted by 50+ engineers across 4 regions, strengthening cross-team visibility and reducing incident triage time through faster isolation of unhealthy clusters.
- Orchestrated SSO integration rollout, improving access governance, increasing adoption & strengthening audit traceability for 200+ internal users.
- Owned the product vision and roadmap for an internal platform monitoring solution (AGRID THOR) by identifying recurring inefficiencies in manual health-check workflows and translating them into a structured 6–12 month product strategy aligned with Engineering, SRE, and Security stakeholders.
- Conducted stakeholder interviews and analyzed incident patterns across multiple systems to define a unified “single-pane-of-glass” platform view, enabling real-time visibility of system health and reducing dependency on fragmented dashboards (Grafana, Azure Portal, and internal tools).

PROJECTS

- **Personal UX Redesign Case Study – Cisco Webex Meeting App**
 - Conducted a usability assessment of the Cisco Webex Meeting App, uncovering 8+ usability gaps across navigation architecture, meeting controls, and onboarding experiences.
 - Crafted redesigned user journeys for 5 critical workflows, delivering 15+ wireframes and interactive Figma prototypes with emphasis on accessibility, usability consistency, and improved task completion efficiency.
 - Structured and presented a detailed UX case study highlighting user pain points, design rationale, research assumptions, and recommended experience enhancements supported by UX analysis methodologies.
- **UI/UX & Mobile App Project – Décor Event Management App**
 - Developed and designed a mobile application solution focused on streamlining event booking, coordination, and management for small-scale event management businesses.
 - Architected 10+ user flows, interface screens, and interaction models to simplify booking operations and enhance overall customer experience.
 - Established interactive application prototypes integrated with Firebase backend services, validating 3 primary booking workflows through comprehensive end-to-end functional testing.

EDUCATION

- 2020 – 2023
- **B.Tech. in Computer Science**
Institute of Technology, Nirma University

TECHNICAL SKILLS

- User Research & Analysis:** User Interviews & Feedback Analysis
- UX Design & Prototyping Tools:** Wireframing & Prototyping, Figma, Adobe XD, Balsamiq
- Programming Languages:** Python, JavaScript
- Databases:** SQL, Microsoft SQL Server, Firebase
- Cloud & DevOps:** Azure, Kubernetes
- Collaboration & Documentation:** Confluence

CERTIFICATIONS

- Certified SAFe 6 Product Owner / Product Manager
- Microsoft AI Product Manager
- Product Management First Steps
- Product Management: Building a Product Roadmap
- Technical Product Management
- Udemy – Become a Product Manager — Learn the Skills & Get the Job
- Microsoft Certified: Azure Fundamentals
- Udemy – Master Digital Product Design: UX Research and UI Design

PERSONAL DETAILS

- Date of Birth:** 14th September 1999
- Languages Known:** English, Hindi & Gujarati
- Address:** Hyderabad, India
